

Resident R: selected statement excerpts

Statement dated October 21, 2026. Selected excerpts transcribed from the signed source. This is an editorial excerpt, not a facsimile or the complete statement. Name, unit number and signature withheld.

Sometime in mid-March 2026, I approached the office window and spoke with Kim Musgrave about the Resident Commissioner position. During that conversation, I was told that Baker was no longer the Resident Commissioner. When the subject of the upcoming selection process came up, I was told that there would not be an election and that a different route would be taken.

I was not given a meaningful explanation of what that alternative process would involve or how residents could participate. I was not told how to submit my name for consideration, how to express interest in the position, or how residents would have a say in choosing their representative.

My experience left me without a clear understanding of how the position would be filled or how I could have a voice and be involved in the process. I was never afforded an opportunity to throw my hat into the arena despite interest.
